

R1.4.1 - Hotfix

Release Notes

Introduction

These release notes provide information regarding the new features, enhancements and existing bugs that have been addressed in the current release.

Release Number: R1.4.1 - Hotfix

Release Date: 13 Jan 2023

Resolved issues

- Fixed high impacting production issues and migration data fixes, as reported by users, with additional information as below:
- Participants in Manage paid hours are now sorted by: Last name, First name
- Fixed sort order for Most in Need Waiver factor to First Participant Waiver ID
- Users can now search city with partial city names in Org Search fields.
- Removed user's role of data validators which was originally migrated from SPARQ system.
- Updated backend tables for data corrections
- Minor bug fixes
