

SCSEP GPMS

Release Notes – Version 1.8

Release Date: June 6, 2023

GPMS Release 1.8 will address new features, Production data changes and bugs discovered during the previous release.

New Features and Enhancements

- An assignment is now created for the recipient record from the donor record after a transfer.
- Users can no longer populate **Followup 2 Earnings** with 0 when **Followup 1 Wages = Yes**.
- Users are restricted from adding Right of Return (RoR) if a user has an exit date greater than or equal to 90 days. The message "A participant cannot exercise the right of return more than 90 days after exit." is displayed.
- Users are restricted from editing/adding a Right of Return (RoR) for other placements if there are multiple placements and if one of the placements has a RoR.
- Users cannot add a Right of Return (RoR) if, any of the placement is more than 30 days (days between placement start date and Placement end date ≥ 30 days).
- **Manage Re-Enrollment** has been removed from the **Related Actions** tab to the **Placement Screen**
- The Re-enrollment Indicator will automatically populate when a participant enrolls in another grantee within 90 days of an exit.
- A notification will be sent to the **Donor Grantee** when a **Recipient Grantee** declines a **Transfer**.
- Grantee/Sub-Grantee code added to the **Extract** Details Report.
- Added an email link for **Internal QPR** retrieval.
- Users can now edit a closed Assignment and Breaks within closed Assignments even though a case has current active assignment.
- The PA can now edit the PRA screen for cases in Exited-Closed or Exited-In Follow up status.
- All roles (except Read Only) now have the ability to edit an **Exit** for any **Exit Reason**.
- Add **Participant Waiver Factor** card to **Admin Console** for Program Analysts.
- The **CSA Code** type is now a required field.
- User's First Name, Middle Initial and Last Name are now saved using Init caps.
- Service provider field is now optional instead of required for Supportive Service record.
- The PA role is now able to edit and delete exits.

Fixes

- **Date** display corrected on the **Internal QPR**
- **Sub-Grantee name** display fixed on the **Internal QPR**
- **Modified Position** display fixed on the **Internal QPR**

- Fixed an issue where Preproduction Cases were missing characteristics but in **Active** status.
- Revised validation for **Right of Return (RoR)** where participant has an employment lasting 30 or more days.
- Updated migrated cases with the correct Sub grantee Ids.

Known Issues

Issues introduced from deployment of release.

- **Break Extract Report**
 - Unable to generate Break Extract Report.
- **Participant Extract**
 - Duplicate rows were found in Participant Extract for **AARP** and **DC** Grantee.
- **Internal QPR Report - Employment Rate – 2nd Quarter after Exit Measure**
 - The calculation process for this measure was modified to account for the system's inability to validate the relationship between Follow-ups 1 and 2. In order to ensure that the two Follow-ups are consistent, the numerator of this rate requires a participant to indicate a successful Follow-up 1 and Follow-up 2. After discussions with the program office and review of the data, we have determined that this calculation approach is not adequate to accurately reflect performance and are planning a change to remove the Follow-up 2 requirement in a future release.
