SCSEP GPMS

Release Notes – Version 2.4

Release Date: February 9, 2024

GPMS Release 2.4 will address enhancements, Production data changes and bugs discovered during the previous release.

Enhancements

- When users select **G14.Other** as the **CSA Code**, the field **Other Elderly Community Service Assignment Code** will no longer be available for input.
- The **Add Exit** button is now available to the recipient grantee for cases that have been transferred and have a termination letter saved.
- The color and size of the progress bar has been changed.
- The PID has been added to the break extract report.
- The **Waiver of Durational Limit Report** now shows the latest enrollment on the report.
- Time in Subgrantee that is shown in UI is now available in the export of the Current/Exited Report.
- When a break is deleted or ended, the status of the case on the Current/Exited Report is now Active.
- Tasks and notifications for Participant Required Actions (PRA) will only be sent for participants whose statuses are Active or Active on Break.
- The tasks will be cleared for supervisors when a recertification is approved or declined.
- The Days Left on the Cases Summary screen now matches the days left on the WDL export file.
- Users that are requesting a new account in GPMS with the role of Grantee Administrator or Read Only will not be required to select a Sub-Grantee. All other roles are required to select a Sub-Grantee.
- Users will no longer receive a UI error when selecting a case due to the Case Assigned to field being blank.
- Notifications – "10 days without an assignment/break" will be removed for applicants on the waiting list.
- Users requesting a new account in GPMS will be able to resubmit their request if the original submission has been rejected.
- When searching for a participant using the social security number (SSN), and the resulting participant does not have an active assignment and the durational limit days left are between 1 and 30 days, then the following message is displayed: "The following participant was found with that Social Security Number. Please note this participant is [exact value] days from reaching durational limit. Please continue if you wish to add a

new case for this participant. Unless the participant's durational limit date is increased, the termination letter would have to be issued immediately or it may be overdue."

Resolved Issues

- Users who reported an issue that the Tasks related to Physical Exam and IEP not clearing when completed will no longer have this issue.
- Users are no longer receiving multiple identical tasks for Durational Limit Extension.
- Users are no longer receiving multiple identical tasks for Follow Ups.

Known Issues

- Task and notifications issues have not been addressed globally, but only for specific users that submitted a Zendesk ticket.
