

SCSEP GPMS

Release Notes – Version 2.5.1

Release Date: April 16, 2024

GPMS Release 2.5.1 will address new features, enhancements, and bug fixes discovered during the previous release.

New Features

- The grant numbers for program year 2023 are now in GPMS. Whenever a new case is created, the grant number for program year 2023 that is associated with the selected grantee and sub-grantee will be automatically populated in the **Grant** field on the Intake page. GPMS defaults to the latest grant number in the system when auto populating the **Grant** field.

Enhancements

- Users will no longer be able to select Recertification Ineligible in the status field on the Cases page as this option is no longer available.
- Users will no longer be able to do a bulk update for paid hours from the ADMIN CONSOLE > Manage Paid Hours. The removal of this functionality will prevent hours that were entered from 'missing' or zeroing out.
- Participant Hours Report (PHR): Users can now download data for all participants in the Participant table.

Known Issues

- There is a typo in the exported file produced by the report at the individual participant level. The word "Remote" is displayed as "Remove". This will be corrected in a future release.
- When multiple Sub-Grantees are selected in the PHR, results are not returned for all the Sub-Grantees selected. Results are returned only for the first Sub-Grantee selected. This will be corrected in a future release.
