SCSEP GPMS

Release Notes – Version 2.6

Release Date: May 10, 2024

GPMS Release 2.6 addresses new features, enhancements, and bug fixes discovered during the previous release.

New Features

- The system now generates a warning message if the number of rows returned in the Participant Hours Report (PHR) is greater than one thousand (1,000). The warning recommends that the user change their filter(s) to reduce the number of rows returned.
- A checkbox has been added to the PHR to select only assignments with blank or zero Total Hours. The report output meeting those conditions can be exported as an Excel file.
- Users will no longer be able to enroll a participant if the participant has an open placement for a previous enrollment.

Enhancements

- Users for all roles except Read-Only can now add services to existing assignments when the status= Exited-closed or Exited-in Follow-up.
- The **Is Re-enrolled** field on the assignment page has been updated to reflect the correct re-enrollment data. The following scenarios outline the function of the Is Re-Enrolled field **for new enrollments only** (please note the below "Is re-enrolled" logic will be implemented for existing cases in a subsequent release):
    - If a participant has a single enrollment in the system, the value of **Is Re-Enrolled** is *No* on the Assignment page.
    - If a participant exits the enrollment and re-enrolls with the same grantee or another grantee more than 90 days after the exit date, the value of **Is Re-Enrolled** is *No* on the exited enrollment.
    - If a participant exits the enrollment and re-enrolls with the same grantee or another grantee 90 days or less after the exit date, the value of **Is Re-Enrolled** is *Yes* on the exited enrollment.
    - If the re-enrolled active case is deleted from the system leaving the participant with a single exited enrollment, the value of **Is Re-enrolled** reverts to *No* on the exited enrollment.
    - If a participant re-enrolls within 90 days and the Active case has its assignment deleted, returning the case to Eligible, the value of **Is Re-enrolled** reverts to *No* on the exited enrollment.

- Users cannot edit an application date that matches the application date of another case for that participant.
- The system will no longer record hyphenated and compound last names in lower case. In addition, the names and addresses for Organizations will no longer be transformed to lowercase for hyphenated or compound names.
- Users can now edit a contact on the Organization page without being blocked by the nine-digit restriction on the Federal Employer Identification Number (FEIN) field. When adding an organization, however, the nine-digit restriction on the FEIN is still in effect.
- The typo on the export file for the PHR has been corrected from "Total Paid Remove CSA Hours" to "Total Paid Remote CSA Hours"
- The Safety Consultation Date on the Participant Action Report is now based on the current assignment date.
- The Current/Exited Detail report no longer duplicates assignments in the report.
- The instructions for the Total Includable Family Income on the Eligibility section of the Intake and Recertification processes have been changed. The instruction for the twelve-month period is: **Total includable family income during the 12-month eligibility determination period** and the instruction for the six-month period is: **Total includable family income during the 6-month eligibility determination period, annualized.**
- When a user receives a task to update both IEP and Physical Exam details, completing the details for one PRA category no longer removes the task for the other.
- The labels for organization types “Profit” and “Not For Profit” have been changed to “For Profit” and “Not For Profit (501(c)3)”
- The label “UserName” has been changed to “Name” on the SCSEP User Enrollment Request page.
- Users will no longer receive a UI error during the recertification edit process.
- The Employment Status and Residence State fields are now required fields on the Intake page.
- Grantee names (used-as-sub-grantee) have now been removed from the Sub-grantee filters across the system.
- Current/Exited Report - Export is now showing Time in the Subgrantee column.
- The "Assigned to" for a case will now receive a Notification to update a participant’s Waiver Factors if they are still blank when participant is 90 days from their durational limit date. Notifications will only be generated for grantees whose Individual Durational Limit (IDL) policy grants extensions (Option 2 or 3).
- On a participant’s Waiver Factor screen, the label “Low Literacy Status” has been corrected to “Low Literacy Skills”.
- Users are no longer receiving notifications for cases that are not assigned to them.
- When the field ‘Family income at or below 100%’ is edited, the new value is now displayed correctly.

Bug Fixes

- When a new assignment is added to a record with multiple assignments, the paid hours for the new assignment as well as for all previous assignments will display correctly.

Known Issues

- Not all tasks are removed from the task list immediately on completion. They are however, moved from the task list when the overnight job is executed.
