Release Notes – Version 2.9.1

Release Date: September 25, 2024

This release focuses on changes made to the Quarterly Progress Report (QPR), as well as the Organization and Contact modules, the details of which are outlined below.

Fixes

- The Response Rate and Count columns in Admin Console > Manage Performance Goals and Targets are now correctly reflecting the actual values for all the measures instead of “No Performance Goals Record Found”.
- Both remote and in-person Community Service Assignment (CSA) hours are now reflected on the QPR in the numerator (Current QTR and YTD columns) of the Community Service measure.
- Grantee Administrators can again edit existing user information by clicking on the hyperlinked user’s email via Admin Console > Manage Users > Manage Org Roles.
- Duplication of Host Agency as an organization function for some grantees on the Organization page (Additional Details section) has been resolved. Those grantees can now add additional organization functions to their grantee/sub-grantee combination.

Known Issues

- None.
