SCSEP GPMS

Release Notes – Version 26.2

Release Date: August 28, 2026

These Release Notes provide information about GPMS Release 26.2, which includes several new features, enhancements and issue resolutions.

New Features:

- **Case Status**
  - Case Statuses have now been revised, and additional statuses added, to improve GPMS data quality and better align with the SCSEP Employment Outcome Measures. The revised statuses are intended to follow the logic for the **B2.1 Employment Rate Q2** and **B2.2 Employment Rate Q4** after exit performance measures of the QPR.
  - Exit status is no longer dependent on a **Placement** being added to a case. This feature will allow users to better identify all participants in the denominator, or cohort for the B2.1 Employment Rate Q2 and B2.2 Employment Rate Q4 measures.
  - A new status has been added for cases where **Reason for Exit** is **Exclusion**.
  - The Exit Statuses following Release 26.2 are:
    - **Exited – Excluded**: A case has been exited, and the **Category of Exit** is "Other Reason for Exit", and the **Reason for Exit** is "Exclusion"
    - **Exited – In Follow-Up**: A case has been exited for any reason other than "Exclusions at Exit." The In-Follow-Up status is relevant for all cases, with or without a Placement. Cases will remain in this status until they reach **Expired** status.
    - **Exited – Expired**: A case has been exited for any reason other than "Exclusions at Exit", and enough time has passed that the case is no longer counted in the Outcome Measure **B2.2 Employment Rate Q4**. Cases will be moved to **Expired** status at the Year End Close for the program year that includes the 4th quarter after the cases exit.
  - The status **Exited – Closed** has now been removed.
  - A new status, **Transferred**, has been added. Donor Grantees will see **Transferred** status for cases that were transferred from their program to another grantee.
  - Users will not be able to add a placement for cases in **Exited – Expired** or **Transferred** Status**.**

    - The User Interface and Reports have been updated throughout the system to reflect these new statuses.
    - A data fix has been applied to update all previous cases, using the revised Case Statuses.
    - The **Status Tracker Bar** seen at the top of the screen when viewing a case has been removed. The current **Case Status** is now displayed on the top right corner of the screen.
- **Rate of Pay**
    - A new field has been added to the Assignment Details screen for **Rate of Pay**. When adding or editing an assignment, users will now be required to select a radio button identifying if the Rate of Pay for the assignment is the **Federal Minimum Wage**, the **State/local Minimum Wage,** or the **Prevailing Rate of Pay**.
    - When **Prevailing Rate of Pay** is selected, users will also be required to enter the **Wage per Hour ($)** field.
    - **Wage per Hour** is optional when **Federal Minimum Wage** or **State/local Minimum Wage** is selected.

Enhancements:

- **Internal QPR**
    - Updated Internal QPR **Ethnicity/Race** measures to exclude multiethnic individuals from measures **A.3a-A.3F.** Multiethnic individuals are counted in **A.3g. More Than One Race.**
    - The formatting for **B1.3 Most in Need** has been updated and will now display two decimal places for the **Goal**.
    - The formatting for **B2.3 Median Earnings** has been updated and will now display one decimal place for the **Goal**.
- **Other Enhancements**
    - The navigation has been updated when users enter an exit with **Unsubsidized Employment** selected as the **Category of Exit. Previously,** users were directed to the **Add Placement** screen. Users will now be redirected to the **Related Actions** screen, where they can add the placement or complete other data entry before proceeding.
    - Instructions have been added to the **Manage Authorized Positions** admin console. When a subgrantee has changed, grantee administrators must click the **X** to remove the retired subgrantee, and then select the replacement subgrantee. The **Add New Allocation** button should only be used when increasing the number of subgrantees in a county.

Resolved Issues:

- **Internal QPR**
  - Resolved an issue that caused the Internal QPR to include **Training** hours, **Paid Sick** hours, and **PRA** hours to be included in the denominator for the **B1.2 Community Service** measure, in some instances. **Training** hours, **Paid Sick** hours, and **PRA** hours will now be subtracted from the denominator for all cases on the Internal QPR.
- **WIPS QPR**
  - An issue with **Paid Hours** reporting incorrectly in the Q3 WIPS QPR has been resolved. **Paid CSA, Paid Training and Paid Sick** Hours are reporting accurately for the Q4 WIPS QPR.
- **Multiple Cases in Active Status**
  - An issue which resulted in multiple Active Cases being created for the same participant in some circumstances has been resolved.
  - When an **Active** case exists for a participant, users will not be able to modify any **Pending** or **Eligible** cases that exist for the participant.,
  - When an **Active** case exists for a participant, users will not be able to delete an exit, or exercise Return to Service for any previous case.
  - Users will receive the error message “This action cannot be completed because an Active Case already exists for this participant. Please see case [Case ID for Active case]. Contact your grantee administrator or the help desk for additional assistance."
- **Placement Services**
  - **Placement Services** can now be added or edited after a **Placement End Date** has been entered**.** Users can add or edit services that took place during the Placement after the placement has ended.
  - When adding a service after the **Placement End Date** has been entered, a value must be entered for **Placement Service End Date**, and the service end date must be before the **Placement End Date**.
- **Recertification**
  - A Case Manager can no longer edit a Recertification that has already been approved by the Supervisor. And Recertification approval workflow has been improved.
  - Read Only – Restricted users will no longer be able to edit Recertifications.
- **Other Issues**

- After a **Case Transfer** is initiated, users will no longer be able to edit the record. If a Donor Grantee needs to modify a record, the Transfer may be cancelled and reinitiated after the Donor Grantee completes any needed modifications.

Known Issues:

- None.
